Continuation Sheet (PTO-303)

Continuation of 3. NOTE:

The proposed amendment to the abstract would require further consideration and/or search. It is noted that that the applicant failed to provide any reason why the amendment to the abstract was not earlier presented.

Continuation of 11. does NOT place the application in condition for allowance because:

Applicant's arguments are not persuasive.

Regardless of whether Kewley or Andrews or Kolmes was "looking to make a composite yarn having an elastic member to carry substantially all of an alongating stress," the applied prior art clearly reads on the claimed invention for the reasons submitted in the final office action.

The applicant asserts that "...a person having ordinary skill in the art would not find a suggestion or reasonable expectation of success to rely on Andrews to modify the teachings of Kolmes '789 to obtain Applicant's claime dinvention." The examiner respectfully disagrees. Andrews discloses that it is known in the protective garment art to use an elastic core member because apparel can be fabricated with improved form-fitting properties and/or increased comfort (column 1, lines 8-19 and column 3, lines 8-22). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use an elastic core member, as taught by Andrew, because the elastic core member allows for the fabrication of articles with improved form-fitting properties and/or increased comfort.
